EnCase® Risk Manager

Redefine data privacy & compliance:

PROACTIVELY MANAGE SENSITIVE DATA FROM ANYWHERE

The amount of data stored on electronic systems today is exploding and growing at an exponential rate. Data breaches, privacy concerns, and growing e-discovery costs continue to evolve how organizations approach controlling their business data while balancing worker productivity. Add to that, aged or poor data hygiene and this can further increase organizational inefficiencies, in aggregate costing billions annually.

EnCase® Risk Manager is the only automated solution to proactively identify, categorize, and remediate private or sensitive data across the enterprise. Our solution offers the deepest level of insight and control of electronic data across all endpoints, file shares, servers, and cloud repositories. This enables organizations to improve business intelligence, ensure compliance, and mitigate many types of risks.

Our 360° visibility, enabled by our expertise in forensic security, coupled with our patented, next generation EnCase technology will allow you to:

- Find private and sensitive data
- Locate where it's stored
- Categorize and quantify data assets
- Take action based on your business goals

Data privacy, security, and digital investigations

Regulatory and policy compliance

Data Analytics

Data storage optimization

E-discovery data governance best practices

Features

ENCASE RISK MANAGER ENABLES YOU TO IDENTIFY SENSITIVE DATA IN VAST VOLUMES OF DATA QUICKLY AND PRECISELY WITH THESE FEATURES:

Patented Graf technology
EnCase Risk Manager allows users to identify and categorize sensitive data at the 'paragraph-level'

Automated remediation
Able to view file content and remediate sensitive files from one location or every location where that information resides

Distributed processing
Asynchronous connections - via smart agent technology - and distributed processing allow for non-disruptive operations and enterprise scalability

Complete relational data intelligence
Ability to correlate sensitive data to machines, users, geo-location, and other data points provide additional context for greater insight

Purpose built dashboards
Tailored dashboards allow for clear review and reporting on risk distribution and reduction as sensitive data manifests throughout an organization
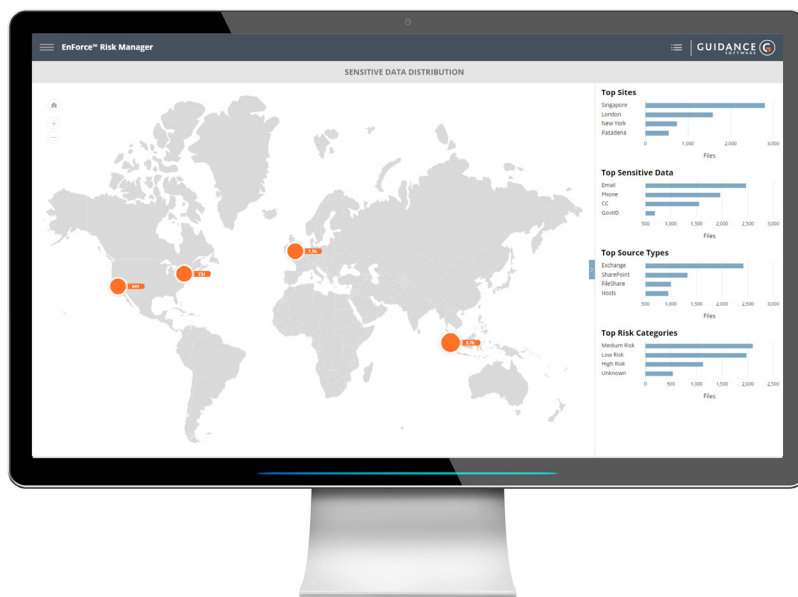

GUIDANCE
SOFTWARE
From beginning to endpoint.

ABOUT GUIDANCE

Guidance exists to turn chaos and the unknown into order and the known-so that companies and their customers can go about their daily lives as usual without worry or disruption, knowing their most valuable information is safe and secure. The makers of EnCase®, the gold standard in forensic security, Guidance provides a mission-critical foundation of market-leading applications that offer deep 360-degree visibility across all endpoints, devices and networks, allowing proactive identification and remediation of threats. From retail to financial institutions, our field-tested and court-proven solutions are deployed on an estimated 35 million endpoints at more than 70 of the Fortune 100 and hundreds of agencies worldwide, from beginning to endpoint.
